

BCS EDINBURGH BRANCH

Sunday 15th April 2001 at 3.00pm

Branch Meeting
in association with
the Edinburgh International Science Festival

Handling the Human Genome

Tim Hubbard

The Sanger Centre

Now that the first draft of the human genome sequence is out, where do we go from here? How will the data be refined and interpreted? Who will control it - governments or commercial companies? And to what extent will the Internet and other new software technologies be used to provide access to this data? Tim Hubbard, head of Human Genome Analysis at the Sanger Centre which lead the UK's human genome mapping effort, outlines the technical challenges and the commercial considerations of this remarkable project

Venue

**Royal Museum of Scotland
Lecture Theatre
Chambers Street, Edinburgh**

If you would like a complimentary ticket or two please send an e-mail to Mike Hurst (edin-sec@bcs.org.uk) giving your name and address. Priority will be given to BCS members.

Tickets are also available from the Edinburgh International Science Festival at £5.00 (£3.00 concessions).
